Wheat Varieties for Kansas and the Great Plains: Your Best Choices

General Policies

The Wheat Farmer/ Row-Crop Farmer

This monthly subscription-based newsletter contains new, relevant, and practical information about agriculture production of major cash crops in the central U.S. plains. We print the latest news in research in various applications: herbicide, fungicide, seed treatments, seed choices, crop rotation options, irrigation/water management, equipment tips, and so on. Most readers of this magazine are farmers located in Kansas, Oklahoma, Colorado, Texas, and Nebraska. These newsletters typically arrive in subscribers' mailboxes in the middle of the month.

Wheat Varieties for Kansas and the Great Plains: Your Best Choices

This annual guide follows wheat harvest in the central plains, intended for use by farmers and seed dealers as an aid in choosing seed for the next year's wheat crop. We analyze the wheat crop with the help from farmers, university experts, and private company professionals and package the data into a practical wheat-selection guide. Our ratings reflect the combined judgments of not just one expert, but of the top public and private wheat breeders, agronomists, and plant pathologists from Kansas, Oklahoma, Texas, Nebraska, and Colorado.

There is no other publication like it. As publication follows wheat harvest and its analysis, its press date depends heavily on Mother Nature, but is usually shipped to readers the middle of every August.

2022 Editorial Schedule

THE WHEAT FARMER/ROW-CROP FARMER

JANUARY	2021 K-State Soybean and Grain / Sorghum yield results and DSM Top Picks for 2021 / Top Picks for 2021 / Burndown and spring residual herbicides for corn and soybeans
FEBRUARY	Fungicides for wheat / wheat spring herbicide options
MARCH	Wheat disease control / Controlling marestail in soybeans
APRIL	Wheat fungicide efficacy / Grain sorghum weed control
MAY	Fungicide decision making, Pre-harvest forecast
JUNE	Postemergence control options for glyphosate-resistant weeds
JULY	New Wheat Variety Preview Preliminary report on wheat variety performance / 2022 Preliminary Wheat yield test results
AUGUST	2022 Final Wheat yield results / Fungicide and insecticide seed treatments for wheat / Wheat and canola production advice
SEPTEMBER	Importance of quality wheat seed / Wheat planting dates / Planning for marestail control in 2022 / Fall weed control in wheat
OCTOBER	Management of late-planted wheat / Planning for pigweed control in 2021
NOVEMBER	Preliminary 2022 K-State Corn yield results / Roundup of fall burndown and preplant herbicide programs for corn and soybeans
DECEMBER	Final 2022 K-State Corn yield results and DSM Top Picks for 2022 / Winter fertilizer and herbicide topdressing in wheat

The July and August issues include field reports of wheat variety performance.

- “Great newsletter and Wheat Varieties book. I really enjoy them. Best value ever.”
– Mark Hammeke, Ellinwood, KS
- “I continue to enjoy your publication. The Farmer Field Notes has very good, practical information. Keep up the good work. It's helpful to read ag topics from Kansas rather than 800 miles away!”
– Glen Ensz, Hillsboro, Kansas
- “It's about the only publication I get excited about when I see it in the mailbox.” – Tom Shute, Esbon, KS

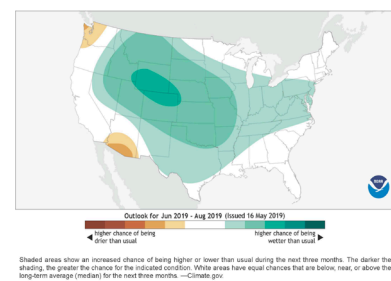

THE WHEAT FARMER/ROW-CROP FARMER
Production News for the Central and Southern Plains By Layton Ehmske
From 34 Star Publishing, Inc., publisher of Wheat Varieties for Kansas and the Great Plains

Conditions: Wheat harvest across the region is late and delayed, begun far behind the timing of average harvests. Record-setting spring rains, and a long, cool growing period led to high yields especially in western Kansas, where fields weren't flooded. The warm and dry conditions typical of harvest are arriving late, as noted by the ambient temperature prediction from the National Oceanic Atmospheric Administration three-month outlook. Harvest reports suggest test weights have been steady, though continuous rains have stalled harvest for many.
